“Belső térben otthon vagyunk!”

A bútorgyártás rengeteget fejlődött az elmúlt években. Az utóbbi időszakban a választható színeken kívül, hatalmas fejlődés történt az alapanyagok terén is. Bútorgyártóként folyamatosan keressük beszállítóink újdonságait, hogy egyedi és igényes bútorokat készíthessünk megrendelőinknek. Az alapanyagtechnológia mára jóval meghaladta az „egyszerű” bútorboltok kínálatát. Manapság elérhetőek a tapinthatóerezetű bútorlap/munkalap fóliák, a szupermatt frontok, az ujjlenyomatmentes PET/PVC ajtók, a nullfugás élzárások, és sok egyéb modern, kiemelkedő élettartamú alapanyag.

Ebben a katalógusban csoportosítva, felhasználás szerint kategorizálva mutatjuk be ezeket az alapanyagokat, hogy ezzel segítsünk megrendelőinknek jobban átlátni a bútorkategóriák közötti különbségeket.

# Látványtervezés

A mai modern konyhatervezés és gyártás szinte elképzelhetetlen 3D látványtervezés nélkül. Egyfelől látványos és pontos képet ad a megrendelőnek a konyhabútor megjelenéséről, másfelől hatalmas segítség a gyártónak is. Még a véglegesítés előtt kijönnek a tervezési hibák (összeakadó ajtók, nem megfelelő nyitási irány, csempe/üveghátfal pozíciójának hibái), és az esetleges színösszeállítás problémái. A látványtervezés első lépése a szobatervezés, vagyis helyszín lehető legpontosabb lemásolása. Terveinken szerepelnek az ügyfél konyhájának ablakai, ajtói és minden fix eleme. Ezután kezdjük a bútorelemek beillesztését, méretezését, és precíz elhelyezését. Amikor a korpuszok az ügyfél által kívánt helyükre kerültek, a kiválasztott munkalapok, vízvetők, lábzetők is felkerülnek a tervre. Ezek után illesztjük a mosogató tálcat, főzőlapokat és az összes konyhagépet. Az általunk készített látványtervek minden esetben méretpontosak és gyári katalógus színekkel készülnek, így az vásárló pontosan fel tudja mérni az arányokat valamint a színösszeállítást.
